Dear guests,

On behalf of the Organizing and Scientific Committee, it is my great pleasure to welcome you to Novi Sad and to the International Symposium on Nuclear Medicine. The scientific program of the Symposium will present the latest innovations in the field of nuclear medicine. It will combine the two most important fields of nuclear medicine: diagnostics and therapies. Our distinguished invited speakers are the leading experts in these fields and will present their latest state-of-the-art lectures and their own results in these areas. The aim of this conference is to bring together the nuclear medicine community from different countries. At the same time, the participants of this Symposium will get the opportunity to share their own experiences in nuclear medicine. This Symposium will evaluate the current status of general nuclear medicine and nuclear medicine theranostics – imaging and therapy - and identify future challenges and directions in this field of medicine.

We wish you a pleasant and memorable stay and hope that this meeting will be a fruitful scientific experience for all of you.

*Sincerely Yours,
Prof Jasna Mihailovic
President, Organizing Committee*
